

Installer Name: Customer Name:

Unit Rate

I acknowledge that the above named installer will use the figure ofp per kWh for my unit rate for the reason stated below. I understand that if my actual unit rate is higher than this amount then my estimated annual savings will be more and if my actual unit rate is less, then my estimated annual savings will also be less. Savings are estimates only and will be naturally affected by any increases or decreases to the cost of energy over the lifetime of the system.

Annual Grid Consumption/Annual Spend

- ☐ **I know my grid consumption:** I acknowledge that the above named installer will use the figure of kWh for my annual grid consumption, for the reason stated below.
- ☐ **I do not know my grid consumption:** I acknowledge that the above named installer will use the figures of £ as my annual electricity spend, andp per day as my standing charge, for the reason stated below.

I understand that my annual grid consumption can affect the estimated savings I could make where Solar PV and/or Battery Storage is being installed (the greater the usage, the more opportunity there is to make savings). Therefore, the savings estimate is dependent on this figure being reasonably accurate.

Reason for not having utility bill:

.....

.....

I agree that the above named installer may use the stated unit rate, annual grid consumption and/or annual spend figure to calculate my solar savings for the purposes of validation.
